LATTICE

*Education, training,
research and development*
MONTROUGE (FRANCIA)
03/2017 - 07/2017

Main activities and responsibilities: The topic of the stage was to implement a multilingual framework which could automatically extract a syntactic and semantic properties of verb arguments for several languages from Universal Dependencies treebanks. The aim was to build valence lexicons for different languages and then study how to derive a single multilingual lexicon in order to explore crosslinguistic phenomena on argument structure.

Acquired skills and achieved objectives: Manipulation of corpora, program implementation, analysis of the results, evaluation.
Employed as: intern/trainee internship

Supervisor: Laurent
Prévo

LABORATOIRE PAROLE ET LANGAGE (LPL)

*Education, training,
research and development*
AIX-EN-PROVENCE
(FRANCIA)
09/2015 - 12/2015

Main activities and responsibilities: The training was aimed at developing a distributional lexicon for the French language: in computational semantics, this type of resource is used to represent some aspects of the lexical meaning of verbs, nouns and adjectives, through the statistical distributions of words, obtained through automatic extraction from textual corpora. My research has led to the creation of LexFR, a lexicon of French verbs for sub-categorization.

Acquired skills and achieved objectives: Distributional semantic and methods of implementation of distributional lexicons, NLP programming experience (Python), program implementation, working with deadlines
Employed as: intern/trainee internship
